Dear Mr. Ayers:

Land and Lakes Company hereby requests that Supplemental Permit No. 1981-84 be renewed. This permit allows incorporation of sewage sludge into intermediate cover material to enhance the growth of vegetation and control erosion.

Because of the nature of this supplemental permit and the fact that it is a renewal, it follows that professional certification is unnecessary.

I would ask that an emergency permit be issued for the following reasons:

1. Sludge disposal contracts recently thought to be terminated will be awarded in the very near future.
2. Sewage sludge incorporation into cover will provide the topsoil characteristics necessary to allow vegetative growth. It will be necessary to complete this work so that seeding may take place in the autumn, thus assuring an effective erosion control program during the winter and spring seasons that follow.

Your prompt attention in issuing this renewal is appreciated.

Very truly yours,

LAND AND LAKES COMPANY

*Robert M. Murphy*
